FLIGHT SAFETY OFFICER REPORT — Ray Pfeffer

Radio test of 3 July- Ray and Scott DeArman (observer) described the testing of the air to ground communication test using the handheld radios. The results were outstanding with clear communications from the north ramp of Prescott Airport to the aircraft (Dan's 185) out to approximately 15 nm both direct on the State SAR frequency and through the Mingus repeater. The observer used the supplied ear bud and microphone on the cord under the aircraft headset allowing both the intercom and air-to-ground handheld radio to be heard.

We will order 7 of the handheld radios from Amazon paid for by Air Group funds. The cost is approximately $40/radio. They are to be signed out by the pilots for use in their aircraft.
